

Missor - Nador

The last day in morocco is sad but the rally is not over yet and it could be easy for anyone to make a mistake which would cost them a valuable place in the standings. For some of the riders and drivers it is enough to just finish and they are hoping that there bike or car will last just a few more kilometers.

Today's stage starts with some water at a river crossing, as it has not rained so much in the days before the rally it is not too deep. Then some fast open pistes are to follow. The motorcycle Profi class then had a tricky river bed and Donkey Trail to climb. The Special of the day had some very tricky navigation and it cost some of the front runners in the Moto Profi class some extra time.

The last piste in Morocco was through the Hills near Nador and gave some interesting sights and smells in the fertile orchards that it passed through.

By 8.30 pm the ferry was loaded and everyone was ready for a drink in the bar before the last day in Spain.
